

Clinton Brown

E-Commerce Full Stack Developer

xxx, xx

contact No: (xxx) xxx-xxx

Email: xxx@gmail.com

<https://www.linkedin.com/in/xxxxxxx/>

Summary

- Passionate and creative E-Commerce Full-Stack Developer with 8 years of experience designing, building, and scaling high-performance e-commerce platforms across Shopify, Shopify Plus, WooCommerce, WordPress, and headless architectures.
- Full-stack expertise in React, Next.js, TypeScript, Node.js, PHP, Python, Liquid, and integrating RESTful & GraphQL APIs, connecting payments, logistics, ERP, POS, CRM, and marketing automation systems.
- Specialized in Shopify Plus: customizations, custom app development, headless commerce, CRO, SEO optimization, and scalable frontend architecture.
- Business-focused engineer: bridges technical execution with growth strategy, delivering measurable results such as improved Lighthouse scores, faster page loads, higher conversion rates, and increased AOV.
- Experienced in automation, analytics, and AI-assisted workflows using Zapier, Make.com, Klaviyo, GA4, Hotjar, and custom backend systems to streamline operations and drive revenue.
- Skilled in CI/CD, Docker, Kubernetes, cloud-native architectures (AWS, Azure, GCP), and Agile practices, capable of owning projects end-to-end from discovery to ongoing optimization.
- Seeking senior-level opportunities where technical leadership, system design, and e-commerce growth intersect.

Skills (check if there is any technical mistake)

Language	JavaScript, TypeScript, HTML5, SCSS, Liquid, PHP, Python
Frameworks	Node.js, React.js, Tailwind CSS, Next.js, Vue.js, Express.js, Laravel, Shopify Hydrogen, Magento, BigCommerce, EC-Cube, Wagtail, Sitecore, Shogun, PageFly, Replo, Retool, Airtable, NoloCo
Libraries/APIs	GraphQL, jQuery, Shopify Admin API, Shopify Storefront API, REST APIs, EC-Cube API, Shopify Webhooks, Zapier, Make.com, Pabbly, Klaviyo, Segment, Shopify Flow, Ansible, Jest, React Testing Library, Cypress, Postman, BrowserStack
Tools	Figma, Miro, Notion, Jira, Trello, Slack, Confluence, Zoom, Microsoft Teams, Vercel, Netlify, Cloudflare, Firebase Hosting, Azure DevOps, Google Analytics, Hotjar, Google Search Console, GTM, Mixpanel, Git, GitHub, GitLab, Bitbucket, CI/CD pipelines, Docker, Ansible, Lighthouse, Chrome DevTools
Paradigms	UX/UI Design Principles, Responsive Design, Website Accessibility (WCAG 2.1 A/AA), Semantic HTML, ARIA roles, Keyboard Navigation, Screen Reader Optimization, CRO (Conversion Rate Optimization), Conversion Funnel Optimization, SEO Auditing, A/B Testing, Performance Optimization, Core Web Vitals
Platforms	Shopify, Shopify Plus, Shopify App, WooCommerce. Headless CMS Architecture, Contentful, Adobe Commerce Cloud
Storage	MySQL, PostgreSQL, Firebase, MongoDB, Oracle PL/SQL, Amazon DynamoDB, Supabase
Other	Stripe, PayPal, Square, AfterPay, Paidy, Konbini, ShipStation, EasyPost, Printful, Shopify Shipping, Custom Pixel, Conversion API

Experience

JustBlinds

Dec 2025 - Present

Role: Senior Ecommerce Full Stack Developer

Location: Frisco, TX

Responsibilities:

- Led a comprehensive SEO initiative to optimize metadata, schema markup, image handling, and crawlability. Monitored high-value landing pages using Google Search Console and maintained a perfect SEO score, resulting in significant increases in organic traffic and search visibility.
- Conducted in-depth performance audits using Lighthouse, WebPageTest, and Chrome DevTools. Resolved render-blocking resources, JavaScript bottlenecks, and inefficient Liquid patterns. Optimized theme architecture and asset delivery, improving LCP, FID, and CLS metrics, reducing page load times and enhancing user experience.
- Migrated over 3,500 legacy images to WebP, implemented responsive sizing, and standardized alt text for SEO and accessibility compliance, improving mobile performance and page load times.
- Architected a secure, scalable backend system for internal form management, replacing third-party solutions to reduce costs, improve data ownership, and enhance form handling. Introduced role-based authentication to ensure secure access across internal teams.
- Developed internal tools for pagination, bulk actions, and data export, streamlining operational workflows and enabling faster decision-making and improved data management.
- Collaborated with leadership, operations, and marketing teams to align technical solutions with business objectives. Developed a custom Shopify app enabling teams to attach operational notes to purchase order line items, improving communication and workflow efficiency. Migrated historical trade account data into a centralized system, ensuring data integrity and seamless migration.
- Delivered measurable improvements in site speed, user experience, and organic search traffic through performance and SEO initiatives. Developed custom internal tools that reduced manual work, optimized workflows, and enabled data-driven decision-making, improving efficiency and reducing operational costs.

Technologies: JavaScript, React.js, Next.js, Node.js, Express.js, PHP, Liquid, RESTful APIs, Shopify, Shopify Admin API, Shopify App Development, Lighthouse, WebPageTest, Chrome DevTools, SEO Auditing, Performance Optimization, Core Web Vitals (LCP, FID, CLS), Google Search Console, UX/UI Design Principles, Custom App Development, Responsive Images & WebP Optimization, Accessibility Compliance, Internal Tool Development, Data Migration, Workflow Automation

Siteminis

Apr 2023 - Oct 2025

Role: Senior Full Stack Developer

Location: ATL, GA

Responsibilities:

- Blended senior engineering execution with strategic business support and investor communications, working closely with executives and founders.
- Collaborated with leadership to align product development with long-term business goals and fundraising objectives.
- Contributed to investor decks, performance summaries, technical roadmaps, and due diligence materials.
- Acted as a bridge between engineering and business teams, translating complex technical concepts for stakeholders.
- Led the design and development of cloud-based SaaS solutions for business-critical applications, including time tracking, workforce analytics, and productivity optimization.
- Architected scalable, secure backend systems to meet enterprise requirements for performance, reliability, and compliance.
- Integrated machine learning features to analyze anonymized employee productivity metrics and time utilization trends.
- Built reporting pipelines to transform raw activity data into actionable insights for management teams.
- Developed secure, event-driven REST APIs for integrations across email systems, internal services, and third-party platforms.
- Ensured data consistency, fault tolerance, and operational observability in production environments.
- Designed modular frontend components for rapid iteration, maintainability, and scalability.
- Collaborated with product managers to translate user feedback into prioritized engineering deliverables.
- Participated actively in agile ceremonies to continuously improve development processes.
- Supported enterprise customers with technical onboarding, issue resolution, and system optimization.

- Balanced technical decisions with business considerations, including pricing strategies, feature differentiation, and scalability costs.
- Provided insights into market positioning, competitive strategy, and product differentiation to guide business decisions.

Technologies: React.js, Next.js, Vue.js, HTML5, SCSS, Tailwind CSS, JavaScript, TypeScript, UX/UI Design, Accessibility (WCAG 2.1 A/AA), Node.js, Express.js, PHP, Python, Laravel, REST & GraphQL APIs, Webhooks, Shopify APIs, AWS (Lambda, API Gateway, ECS, S3), Docker, Vercel, Netlify, Cloudflare, Firebase, MySQL, PostgreSQL, MongoDB, Oracle PL/SQL, DynamoDB, Supabase, Machine Learning Features, Data Pipelines, Analytics (Google Analytics, Hotjar, Mixpanel), A/B Testing, Conversion Optimization, Agile, CI/CD, Git/GitHub/GitLab/Bitbucket, Jira, Trello, Slack, Notion, Figma, Miro

Sweat Pants Agency

Dec 2022 - Mar 2023

Role: Senior E-Commerce Developer

Location: Owings Mills, MD

Responsibilities:

- Spearheaded technical discovery phases for global e-commerce brands, conducting in-depth platform assessments, identifying bottlenecks, and recommending scalable architectures for seamless digital experiences.
- Designed and implemented high-traffic, content-rich storefronts using headless commerce strategies powered by Shopify Plus and Next.js, optimizing both performance and user experience.
- Optimized storefront performance through techniques such as code-splitting, server-side rendering (SSR), and efficient API consumption, reducing load times and bounce rates while increasing engagement.
- Developed and maintained custom Shopify apps to handle complex business logic, including advanced shipping rules, subscription models, and loyalty programs, enabling highly personalized customer experiences.
- Integrated and streamlined third-party systems—including ERPs, CRMs, fulfillment platforms, and analytics tools—ensuring seamless data synchronization and operational efficiency across the e-commerce stack.
- Automated repetitive workflows using Zapier, Make.com, and Pabbly, saving time and streamlining internal and client-facing operations.
- Implemented structured A/B testing and CRO initiatives for product detail pages, checkout flows, and promotional campaigns, driving measurable conversion rate improvements.
- Supported global expansion strategies via Shopify Markets, managing localization, multi-currency handling, and tax compliance for international audiences.
- Collaborated with designers to create accessible, responsive design systems with Tailwind CSS and React.js, ensuring visually compelling and user-friendly storefronts.
- Designed and delivered Hydrogen-based storefronts for clients requiring advanced customization and performance guarantees, maintaining exceptional stability under high traffic loads.
- Conducted comprehensive SEO audits and performance reviews using GA4, Hotjar, and Search Console to improve organic rankings and enhance customer journeys.
- Acted as a trusted advisor to clients, providing strategic guidance on e-commerce scalability, technical solutions, and long-term growth optimization.
- Mentored junior developers, instilling engineering best practices to ensure code quality, consistency, and adherence to modern development methodologies.
- Maintained enduring client relationships through ongoing site optimizations, performance monitoring, and technical support, helping businesses evolve alongside technological advancements.

Technologies: Shopify Plus, Headless Commerce, Shopify App Development, Shopify Markets, Next.js, React.js, Tailwind CSS, Responsive Design Systems, UX/UI Design Principles, Accessible Design, APIs, GraphQL, Performance Optimization, Server-Side Rendering (SSR), Code-Splitting, SEO Auditing, Google Analytics 4 (GA4), Search Console, Hotjar, Conversion Rate Optimization (CRO), A/B Testing, Workflow Automation with Zapier, Make.com, and Pabbly, Mentoring, Engineering Best Practices

Volusion

Oct 2019 - Nov 2022

Role: Lead Shopify & WooCommerce Developer

Location: Austin, TX

Responsibilities:

- Spearheaded the design, development, and optimization of Shopify and WooCommerce storefronts, ensuring high performance, scalability, and secure operations under heavy user traffic.
- Architected end-to-end e-commerce solutions, including theme customization, app integrations, and personalized checkout processes, enhancing customer journeys and conversion rates.

- Developed custom Shopify apps and extensions to address complex merchant requirements, extending platform functionality beyond native capabilities.
- Integrated advanced payment solutions and customized checkout flows to meet regional, currency, and compliance-specific needs for global merchants.
- Built omnichannel systems by linking Shopify POS with inventory management, ERP, CRM, and loyalty platforms, creating unified customer profiles across online and offline channels.
- Leveraged Shopify REST and GraphQL APIs to synchronize products, orders, and customer data across multiple platforms, streamlining operations.
- Led technical SEO and CRO initiatives, optimizing site structure, metadata, and user funnels to drive organic traffic and increase purchase completion rates.
- Automated internal workflows and merchant operations using Python, Nolooco, Zapier, Make.com, and Pabbly, significantly reducing manual effort and operational errors.
- Served as the technical authority for complex e-commerce projects, providing architecture guidance, hands-on problem-solving, and troubleshooting under tight deadlines.
- Collaborated closely with product managers, sales teams, and external partners to align technical solutions with business objectives, delivering measurable merchant success.
- Ensured long-term scalability and security by applying best practices in code quality, system design, and documentation.

Technologies: Shopify, Shopify Plus, WooCommerce, Shopify POS, REST APIs, GraphQL, Stripe, PayPal, Square, AfterPay, Paidy, Node.js, Express.js, PHP, Python, MySQL, PostgreSQL, AWS, Azure DevOps, Docker, UX/UI Design Principles, Figma, Miro, Conversion Rate Optimization (CRO), Technical SEO, Performance Optimization, Git, GitHub, GitLab, Jira, Trello, Slack, Microsoft Teams, Code Quality, Documentation, System Architecture, Automation

Nucleus Commerce

Jun 2017 - Oct 2019

Role: Full Stack Developer

Location: Springfield, MO

Responsibilities:

- Developed custom full-stack e-commerce solutions on Shopify, WordPress, and EC-Cube, tailoring features to client requirements and regional market demands.
- Adapted storefronts to regional compliance needs, including local tax rules, language localization, and consumer behavior, ensuring consistent customer experiences.
- Engineered React-based, mobile-first frontends optimized for performance, usability, and scalability across devices and screen sizes.
- Implemented advanced commerce functionalities such as intelligent product search, wishlists, order tracking, and personalized account management, boosting customer retention and engagement.
- Integrated local payment gateways including Konbini, PayPay, and Paidy, delivering seamless, region-specific checkout experiences.
- Deployed and configured Shopify POS Pro systems to enable omnichannel operations with inventory syncing, barcode management, and in-store checkout customization.
- Modernized legacy backends using Node.js and PHP, improving performance, maintainability, and scalability.
- Optimized server response times through database query tuning, caching strategies, and backend logic enhancements, significantly increasing system performance.
- Ensured compliance with regional data protection and e-commerce regulations, including privacy and consumer protection laws.
- Designed and implemented CI/CD pipelines with GitLab and AWS, automating deployments and improving release reliability.
- Developed monitoring, logging, and alerting systems with AWS CloudWatch, proactively detecting and resolving production issues.
- Introduced modular frontend architectures with Next.js and Redux, enabling future multi-brand and multi-store scalability.
- Collaborated with UX researchers and designers to run A/B tests on layouts, navigation, and checkout flows, enhancing user experience.
- Improved user engagement and reduced bounce rates by iterating UI/UX designs based on analytics and A/B test results.
- Mentored junior developers through code reviews, technical guidance, and documentation, elevating team productivity and quality of work.

Technologies: Shopify, WordPress, EC-Cube, React.js, Next.js, Redux, JavaScript, TypeScript, Node.js, PHP, REST APIs, GraphQL, Firebase, MySQL, Stripe, PayPal, Konbini, PayPay, Paidy, Shopify Webhooks, SEO Auditing, Performance Optimization, CI/CD pipelines, GitLab, AWS, Docker, UX/UI Design Principles, A/B Testing, Google Analytics

Velocity Technology Solutions

Nov 2014 - Apr 2017

Role: Frontend Developer

Location: Charlotte, NC

Responsibilities:

- Spearheaded the design and development of scalable, responsive e-commerce frontends with React.js, optimized for desktop, tablet, and mobile devices.
- Integrated frontend solutions with multiple CMS platforms and backend systems, enabling dynamic content delivery and seamless management.
- Built analytics dashboards to track user behavior, sales, and conversion funnels, providing real-time insights for business decisions.
- Developed reusable, configurable CMS components, empowering non-technical teams to manage content independently.
- Improved mobile and tablet experiences through UX optimizations, responsive layout enhancements, and performance tuning.
- Leveraged heatmaps, session recordings, and behavioral analytics to inform interface design and boost user engagement.
- Collaborated with backend engineers to implement REST and GraphQL APIs, ensuring efficient data flow and content delivery.
- Delivered high-impact microsites for seasonal promotions, product launches, and marketing campaigns within a unified CMS framework.
- Participated in Agile workflows, including sprint planning, backlog refinement, and iterative deliveries.
- Led peer code reviews to maintain best practices, high-quality code, and design consistency.
- Contributed to an internal Storybook component library, accelerating UI development and standardizing design patterns.
- Created reusable UI components and standardized styling guidelines to improve development efficiency.
- Implemented custom analytics tracking, marketing pixels, and campaign landing pages to support digital marketing strategies.
- Supported SEO initiatives by optimizing page performance, semantic markup, and accessibility compliance.
- Ensured cross-browser compatibility and adherence to web accessibility standards across all web projects.

Technologies: React.js, Responsive Design, UX/UI Principles, CMS Integration, Component Libraries, Analytics & Tracking, REST & GraphQL APIs, SEO, Web Accessibility, Performance Optimization, Agile, Code Reviews, UX Enhancements
